

Content Managed Websites

We can create a new website for you **from scratch**. You have a choice of content management systems to choose from (including Wordpress, Joomla, Drupal etc) although we would recommend Wordpress for simplicity, ease of use and sheer power. Not to mention search engine friendliness.

For those on a budget, you can start with one of our themes (from an expanding library) and customise with your colours, logo, images & content.

See some samples below.

Selling Online is Easy!

The Internet offers anyone the chance to sell online to a global audience in an extremely cost effective way. Using just your web browser and our new e-commerce software, 1602 Shopping Cart, you can begin selling online through your own e-commerce store in just a few days from now – and for a fraction of the cost typically associated with building a complete e-commerce web site from scratch.

Introducing 1602 Shopping Cart

1602 Shopping Cart was designed to allow small-medium businesses to have their own online store up and running in just minutes. It includes everything you need to sell online, including:

- » A professional looking storefront with your company logo, "about us" and contact details
- » Easy integration with popular payment and shipping providers such as Royal Mail, PayPal and Google Checkout
- » Add products to your store (complete with images and more) using only your web browser
- » Flexible inventory control and product variations to sell customized products such as t-Shirts or computers
- » Process orders and print invoices from your store's control panel
- » ... and much, much more

What Our Customers Are Saying

"I was very impressed with the user-friendly interface that would allow someone like me (a "DIY-er" with basic computer knowledge and a little HTML / FrontPage experience) to create an ecommerce website that looked good." – Gary Smith

"So far I have been very impressed with your shopping cart. I operate [an] online store for over 7 years now and usability in front and back end makes your cart definitely top of the line." – WingTsun Australia

"The shopping cart is absolutely awesome! I can't wait to see what features come next. I really hate to tell you that we have spent many years and a fortune customising/using other commercially available catalogue/shopping carts, and finally developing our own custom catalogue. Nothing we have come up with compares to your offering." – Glenn Stockton

"My Shopping Cart site went live on the weekend without a hitch. My existing customers all love the new site. Thanks to you guys for great software that has made my life a lot easier." – Janine Toole

Start Selling Online Today!

We can offer you a complete e-commerce solution which includes your storefront, training, merchant advice and integration, etc. Please contact us to discuss your needs. Contact us to learn more.

Welcome!

Welcome to 1602media. A new approach to web design.

We here at 1602media believe in providing you with a very unique experience.

- » No jargon (or a little of really needed).
- » Upfront
- » No nasty surprises
- » Very competitive pricing
- » A project manager that actually knows what they are talking about.
